

# ENHANCED MTSS PLATFORM FOR K-12

A K–12 platform that powers MTSS through **Individualized Growth Plans (IGP)**, real-time insight, and readiness supports.

## OVERVIEW

**Spectra Star** unifies the emotional intelligence component of MTSS by connecting SIS and LMS data with screening, growth planning, progress monitoring, and reporting in one secure platform.

It supports all learners with a single source for whole-student growth and a professional growth tool that strengthens visibility, documentation, and follow-through. Earlier insight enables earlier intervention and clearer, data-informed decisions at scale.

### Benefits [\(click here to learn more\)](#)

Spectra Star unifies the emotional intelligence component of MTSS by connecting multiple stakeholder inputs, SIS data, and LMS data with screening, growth planning, progress monitoring, and reporting in one secure platform

- **Brain-science informed supports** that reduce staff workload through structured workflows and automation.
- **Performance-based progress monitoring** tracks competencies and learning inhibitors, building capacity in all stakeholders.
- **Enhanced algorithms** that strengthen pattern detection and support targeted growth strategies.
- **Secure, proprietary AI** that differentiates data points to surface actionable insights.

## WHAT MAKES SPECTRA STAR DISTRICT-READY? [\(click here to learn more\)](#)

01

**One platform—** where people and systems intersect

**Connects emotional intelligence** SIS and LMS data with growth planning, monitoring, and reporting in one place.

02

**Leverage future—** ready MTSS design

**Uses an Enhanced Tier 3** structure with Individual Growth Plans today, with an expansion path for additional tiers as districts are ready.

03

**Single Source—** for whole-student growth

Organizes **supports using competencies** and learning inhibitors across thinking, interpersonal, character, and physical domains.

04

**Professional Growth Tool—** for built-in visibility and accountability

**Progress monitoring** and documentation use multiple data points to support earlier intervention and clearer decision-making.

Spark potential.

Target growth.

Achieve progress.

Rise to possibility.

# ADVANCED CAPABILITIES

**AI-enabled growth strategies** with learning-inhibitor reduction supports

**Safety indicators** with role-based alerts for designated decision-makers and collaborative response workflows

**Real-time progress monitoring** across students, classes, and schools with immediate notifications routed to staff members

**K-12 growth strategies** including secondary college, career and technical readiness supports

# FEATURES

Designed for district-scale implementation with role-based permissions and secure data practices.

## SYSTEMS

### DATA COLLECTION

Integrates SIS, LMS and stakeholder data into one unified system.

## ALIGNMENT

### 24/7 ROLE-BASED ACCESS

Secure, role-based portals for students, teachers, parents, counselors, and providers. Data entry and visibility available across devices with role-based access.

## IMPACT

### MTSS + IGP (ENHANCED TIER 3)

Includes Individual Growth Plans aligned to tiered supports to strengthen fidelity, coordination, and measurable progress monitoring.

## SECURE

### DIGITAL CUMULATIVE DASHBOARD

A secure, digital cumulative student record that centralizes academic and individual growth data and updates in real time as teams document supports and progress.

## MONITORING

### DASHBOARDS + REPORTS

Easy to read dashboards plus AI-generated reports to support decisions and document progress across students, classes, schools, and districts.
